

Cover Letter-

Dear Mr/Mrs. Hiring Manager,

I would like to apply for the position of a Electrical Engineering Intern. I am currently pursuing a master's degree in Electrical and Computer Engineering at Northeastern University.

My project experience includes working at the Indian Institute of Science, Bangalore and the Indian Institute of Technology, Madras. These experiences broadened my skills to include coding in Python and C++. I continuously seek to expand my knowledge by keeping myself up to date. I would like to reiterate how my background in Integrated circuits and knowledge of software tools such as Cadence, Python, and Matlab match the skills and qualifications you are looking for in an engineering student.

As an electrical engineering major, I have a strong theoretical background for my embedded system knowledge. I have taken courses on subjects including linear systems analysis, analog integrated circuit design, VLSI, and Microcontroller Architecture.

I am looking forward to discussing my skills and hearing from you. Thank you very much for your time and consideration.

Thanks,

Pragadeesh Suresh Babu
